About the data

Data included in this report is collated from public sources, reporting by the 9fin editorial team and submissions from direct lenders. Available data may not reflect all market activity and, in some cases, historical data in the report have been revised as more information comes to light. To make sure your firm's deals are included in our analysis and league tables, email private-submissions@9fin.com. Deals are counted based on the following criteria:

Criteria for inclusion

- Debt provided directly to corporate borrowers, whether secured, unsecured or asset-backed
- Financing provided by nonbank lenders through direct lending or credit opportunity funds, or similarly by separate direct lending divisions of traditional banks
- Financing provided on a bilateral basis or by a limited club of lenders at closing
- Unitranche, senior, subordinated or mezzanine debt, including subordinated debt provided by direct lending operations alongside the issuance of bank loans or public debt
- If an incremental financing, it will be considered a new deal if it is at least 90 days after the latest issuance by the borrower or if there has since been a change in ownership or sponsor. Otherwise, it will be considered an additional tranche of the existing deal.

Exclusions

- Amendments, extensions, or repricings of existing facilities without new capital commitments
- Drawdowns of existing facilities (deals are counted based on the date capital was committed)
- Syndicated loans or debt provided by direct lenders as part of a bank-led syndication
- Secondary trades of private debt
- Participation in SRT transactions
- Participation by CLOs or special situations funds
- Loans with tenors of less than 90 days
- Add-ons within 90 days of original issue

Faster, smarter debt
